Filing Agent

Is this report being filed by an agent on behalf of a manufacturer or service provider? No

Product Labeling

Do all hearing aid-compatible handsets include labeling? No

Explain: Sony Ericsson Z310 & W580 boxes are not labeled. The company refuses to send labels; inserts are included in boxes.

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those

models, and an explanation of the rating system? Yes

Website address: http://www.iwireless.com/customer_support-hearing_aid.asp

Explain:

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: We keep HAC pamphlets available on our sales floor, we direct customers to [iwireless.com](http://www.iwireless.com) and we work with our customers to make sure they get a phone that best suits their needs.

Methodology for Functionality Levels

Levels of functionality are based on the features and characteristics of each handset. We have basic, inexpensive phones that are easy to use. Our feature phones offer more "extras" that can include cameras, MP3 players, radios, web, video and bluetooth capabilities; these phones are a little more complicated to use and will cost you more money. Smartphones/PDAs are loaded with features; these phones are basically "mini-computers", expensive and complicated to use, but offer the customer the opportunity to set up their phone with the applications "they" want to make it a more personalized experience and require data on their plan.
